## THE EVOLUTION OF SILENCE

The new Stoeger AIRGUNS Patented S3 Suppressor: the ultimate innovation in the airguns industry. Completely developed from scratch, it is the first suppressor in the world to have an interchangeable front sight and an air decompression chamber that further enhances the performance of the new air regulation baffles, optimized to be more performing than the S2 version. The revolutionary design of the new S3 Suppressor has made it possible to develop a longer barrel (35 mm), hence with a greater precision of shooting.

Innovation, Technology and Style are the three principles behind our new "Human Tech Design" philosophy. The new Stoeger AIRGUNS RX20 S3 incorporates the very best in style and performance. The new S3 Suppressor System combines the functions of an internal air regulation baffles and the new decompression chamber, that work in tandem to reduce noise better than any other airguns on the market.

## THE NEW CHALLENGE

The RX line has been developed having in mind a new challenge: the design and implementation of something special that could convey new emotions to both the enthusiastic shooters and those who just want to have fun in the open air or at the shooting range. The RX represents the perfect match between technological style, technical efficiency and care for details. The elegant and ergonomic shapes makes the gun fit perfectly to the shooter. Stoeger AIRGUNS and its new RX line translate technology in style.

The new RX Line is the first compressed air rifle inspired by Urbino, a world heritage city, the cradle of Humanism. With the new RX line, Stoeger AIRGUNS combines Urbino's technical inspiration with the innovative vision of Milan's designers whose experience in Industrial Design (ID) and User Experience (UX) is able to transform their technical inspirations into solid and attractive projects. Just thanks to this combination, Stoeger AIRGUNS creates a new method, based on 3 sound compact concepts: Functional Ergonomics, User Interaction study, User Experience.

RX20 SPORT has identical external style to RX20 S3
SUPPRESSOR but without internal Suppressor technology.
RX20 SPORT longer barrel +95mm extends to the muzzle.

Stoeger AIRGUNS **ProAdaptive Checkering** is the first technical result of our new "Human Tech Design" philosophy. It is the most versatile, efficient and progressive checkering developed so far, one of a kind. It is the result of a project which let shooters expose themselves to a new experience, become one with the airgun and find a perfect feeling with it. The special checkering progression actively and comfortably "fits" the gun, no matter the environment shooters find themselves in.

Stoeger AIRGUNS

Stoeger AIRGUNS offers a shooter the choice of the favourite Grip thanks to the new **Multi Grip System** technology which, by means of an easy and intelligent system, let the rifle grip be changed with the most appropriate grip. Finally, shooters can adapt the rifle to their own style, choosing between an Embossed Grip or the innovative Stoeger AIRGUNS ProAdaptive Checkering.
