

A close-up photograph of two individuals in a field of tall grass. One person, wearing a black cap with a blue 'X' logo and a black jacket, is holding a black airgun. The airgun is equipped with a Steiner XMT 4-12x42mm scope. The person's hand is visible on the trigger guard. Another person's arm is visible in the background, pointing towards the distance. The scene is set in a field of tall grass under bright sunlight.

PRODUCT CATALOGUE 2024

 **Stoeger**[®] AIRGUNS

 **BERETTA**
HOLDING

Stoeger AIRGUNS
is the Brand launched in 2008
by the prestigious industrial **BERETTA HOLDING**

on the international airgun market,
a new niche for the company,
using synergy of Italian Engineering and Design,
Beretta Group experience in the hunting,
shooting and optic industries, production
plants and own Beretta distribution forces.
A team of italian designers and
engineers are permanently
developing new products.

Stoeger AIRGUNS
is the exclusive
BERETTA HOLDING
Brand in the field
of compressed
air shooting.

STOEGER AIRGUNS MISSION

Stoeger AIRGUNS mission is to offer innovative design, advanced ergonomics, fascinating models with excellent ballistic performance at the right price. Our vision is permanent innovation and development of new airgun lines motivating young people to approach the world of hunting and shooting in training by handling air guns and start to develop a proper shooting technique.

DESIGN AND PRODUCT DEVELOPMENT

Innovation in design is the brand's rooted pillar in our ability to understand consumer needs, tastes and aspirations. Italian designers and engineers are constantly engaged to create new possible models where stylistic innovation is combined with functionality. Determined proportions, clear contours, precise lines and pure surfaces are characteristics of Stoeger AIRGUNS design. Design is the focal point where vision, creative inspiration and technology converge. At every phase of the process, from design to industrialization, Stoeger AIRGUNS performs rigorously and tests the quality with precision.

INNOVATION AS A MUST

Stoeger AIRGUNS is synonymous with Innovation and Italian Design. The Airguns are exclusive, sensual, provocative and always unmistakably Italian. In fact, all our models are entirely idealized and designed in Italy. Stoeger AIRGUNS has always been the creator of dynamic and unrivalled rifles.

SPORTING HEART

Stoeger AIRGUNS rifles are recreational air rifles to have fun, to enjoy the first experience of hunting and shooting. Enjoy the nature, feel good and take up a different air rifle. Our rifles are incomparable through their blend of Fascinating Design and Supreme Shooting Ergonomics.

OUR PHILOSOPHY

Stoeger AIRGUNS has always in mind the design and implementation of something special that could convey new emotions to the shooters. The Stoeger AIRGUNS brand has a cutting-edge, distinct and streamlined design with multiple souls: Sporty, Elegant and Innovative.

DESIGNED IN ITALY

HUMAN TECH DESIGN

With its new Lines, Stoeger AIRGUNS creates the first compressed air rifles inspired by Urbino in Italy, a world heritage city, the cradle of Humanism. Stoeger AIRGUNS combines Urbino's technical inspiration with the innovative vision of Milan's designers whose experience in Industrial Design (ID) and User Experience (UX) is able to transform their technical inspirations into solid and attractive projects. Just thanks to this combination, Stoeger AIRGUNS creates a new method, based on 3 sound compact concepts: Functional Ergonomics, User Interaction Study, User Experience.

PRO ADAPTIVE CHECKERING

Stoeger AIRGUNS Pro Adaptive Checkering is the first technical result of our new "Human Tech Design" philosophy. It is the most versatile, efficient and progressive checkering developed so far, one of a kind. It is the result of a project which let shooters expose themselves to a new experience, become one with the airgun and find a perfect feeling with it. The special checkering progression actively and comfortably "fits" the gun, no matter the environment shooters find themselves in.

MULTI GRIP SYSTEM

Stoeger AIRGUNS offers a shooter the choice of the favourite grip and comfort thanks to the new Multi Grip System technology which, by means of an easy and intelligent system, let the rifle be customized. Finally, shooters can adapt the rifle to their own style. Stoeger AIRGUNS rifles are incomparable through their blend of: Fascinating Design, Supreme Shooting Ergonomics, Innovative Style, Technological Capability and Quality.

BEST ACCURACY

Stoeger AIRGUNS XM1 PCP rifles high precision and best accuracy: every Stoeger AIRGUNS XM1 PCP rifle is accuracy-tested to certify your rifle can perform the best accuracy in its category with a 5 shot group. Ammunition used: Stoeger AIRGUNS X-Sport / Stoeger AIRGUNS X-Match; Distance: 10 m; Power of the rifle: Full Power; N° of shots: 5.

XM1 SPORT ADVANCED ACCURACY

The Italian design of the SPORT muzzle brake allow the rifle to be more accurate on target by reducing the turbulence behind the pellets, in order to meet the competition shooter needs.

XM1 SPORT MATCH TRIGGER

The XM1 SPORT match trigger allows the shooter to find the best comfort trigger position in order to achieve the best target acquisition. The length of pull (max. range of 20 mm), inclination and rotation are all fully adjustable. Thanks to the numerous adjustments, the whole trigger action is fluid, soft, light and instantaneous.

FREE FLOATING BARREL

The Free-Floating Barrel system represents a cutting-edge design in the world of air-shooting, particularly in precision shooting. This system redefines how an Airguns barrel is positioned and supported within the Airguns frame. The Free-Floating Barrel system allows the barrel to "float" independently within the Airguns frame. This means that the barrel is not in direct contact with the stock or frame. This innovative technical design has a profound impact on accuracy. This enhanced stability and consistency are fundamental to achieving pinpoint accuracy in air-shooting, where even slight variations in the barrel's position or vibration can make a significant difference in where the shot lands.

ADJUSTABLE TRIGGER

The adjustable trigger feature is designed to provide shooters with the ability to customize their shooting experience to achieve the highest levels of accuracy and comfort. This feature allows the shooter to finely adjust the trigger's pull weight, offering a range from 600 grams to 350 grams. By being able to modify the trigger's pull weight, shooters can find the perfect balance that suits their individual preferences. In essence, this adjustable trigger system empowers shooters to fine-tune their rifle's trigger to match their specific shooting style and requirements, whether that's optimized precision or a more relaxed and comfortable shooting experience.

ADJUSTABLE HAMMER SPRING

The hammer spring adjustment empowers shooters to fine-tune the hammer's opening, enabling precise control over the rifle's power output based on the type and shape of pellets used. Another important technological plus that makes Stoeger AIRGUNS rifles increasingly precise, reliable and versatile in every type of use, in hunting small and medium game, in precision sports shooting and in long-distance performance.

S3 SUPPRESSOR PATENTED *

Completely developed from scratch, it is the first suppressor in the world to have an interchangeable front sight and an air decompression chamber that further enhances the performance of the air regulation baffles, optimized to be more performing than the S2 version. The revolutionary design of the S3 Suppressor has made it possible to develop a longer barrel (35 mm), hence with a greater precision of shooting.

S4 SUPPRESSOR PATENTED **

The latest Stoeger AIRGUNS design evolution of the integral silencer system. It combines the Dual-Effect of the baffles and decompression chamber and now the additional compensator technology. The most advanced technology to reduce the noise better than ever. The best in its class.

RX LINE

The RX Line has been developed having in mind a new challenge: the design and implementation of something special that could convey new emotions to both the enthusiastic shooters and those who just want to have fun in the open air or at the shooting range. The RX Line represents the perfect match between technological style, technical efficiency and care for details. The elegant and ergonomic shapes makes the gun fit perfectly to the shooter. Stoeger AIRGUNS and its RX Line translate technology in style.

XM1 LINE

The PCP XM1 Line ensures the best performance in every shooting situation, thanks to the ergo/anatomical studies performed by Italian Engineers (Human Tech Design) and the best weight-stability ratio of the rifle. XM1 has a cutting-edge, distinct and streamlined design with multiple souls: sporty, elegant and innovative. A distinct style of Stoeger AIRGUNS coupled with traits of a sports rifle and hunting rifle. XM1 provides to the shooter a uniquely emotional experience. With its strong personality, pure design and absolute sportiness, PCP XM1 Line is one of a kind.

- 01 Comfort rear pad**
To provide the best comfort and stability to the shooter
- 02 Two spacers to adapt the LOP**
To the shooter needs, LOP 355 mm max. (med.= 349 mm, min.= 343 mm)
- 03 Adjustable comb**
5 different position (from 0 to +30 mm) to find your best comfort and adapt the rifle to any kind of scopes and shooters
- 04 Improved ergonomics**
The advanced stock design provide multiple grip and shooting position
- 05 Interchangeable pistol grip**
Two different size of pistol grip to provide the best comfort and ergonomics to the shooters
- 06 Ultimate Thumbhole stock design**
For a perfect ergonomics and comfort
- 07 Adjustable hammer spring**
To provide the best power regulation according with the type of pellets used
- 08 Straight-pull loading system**
To provide smooth and fast reload
- 09 Adjustable trigger pull**
From 600 g to 350 g to achieve the maximum accuracy on target and the best comfort
- 10 Integrated picatinny rail**
To provide solid and accurate scope mount
- 11 Hi-Capacity Magazine**
12 rounds in 4,5 mm; 10 rounds in 5,5 mm; 9 rounds in 6,35 mm
- 12 Aluminum receiver**
Lightweight and robust, with strong black matte anodized finishing
- 13 Decompression chamber and holes**
To minimize the air turbulence at the muzzle
- 14 Air regulator gauge**
To check the exact moment to refill the air tank
- 15 Barrel lengths: XM1 Ranger 600 mm, XM1 Scout 450 mm**
Free floating and extra long barrel to provide maximum power and accuracy
- 16 Threaded muzzle**
½" UNF thread to fit various muzzle devices
- 17 Three picatinny rails**
To give at the user the possibility to fit any kind of bipods and accessories
- 18 Flat style varmint forend**
To provide max stability on bench rest
- 19 Air tank**
XM1 Ranger 300 cc - 250 bar
XM1 Scout 200 cc - 250 bar
High air capacity to provide a longer shooting of session before refill
- 20 Air tank gauge**
To accurate check the air tank pressure

XM1 RANGER

The constant quest for improvement has led Stoeger AIRGUNS to develop two new rifles, the XM1 RANGER and the XM1 SCOUT, expanding the range of the XM1 line, offering ideal solutions for small and medium game hunting, as well as long-range and precision shooting.

XM1 RANGER

INCLUDED WITH THE RIFLE

PRO ADAPTIVE LENGTH
Length of pull adjustable with spacers for optimal comfort

ADJUSTABLE COMB
5 different position (from 0 to +30 mm) to find the best comfort and adapt the rifle to any kind of scopes and shooters

INTERCHANGEABLE PISTOL GRIP
Two different size of pistol grip to provide the best comfort and ergonomics to the shooters

STRAIGHT-PULL LOADING SYSTEM
To provide smooth and fast reload

THREE PICATINNY RAILS
To give at the user the possibility to fit any kind of bipods and accessories

ADJUSTABLE HAMMER SPRING
To provide the best power regulation according with the type of pellets used

ADJUSTABLE TRIGGER
From 600 g to 350 g to achieve the maximum accuracy on target and the best comfort

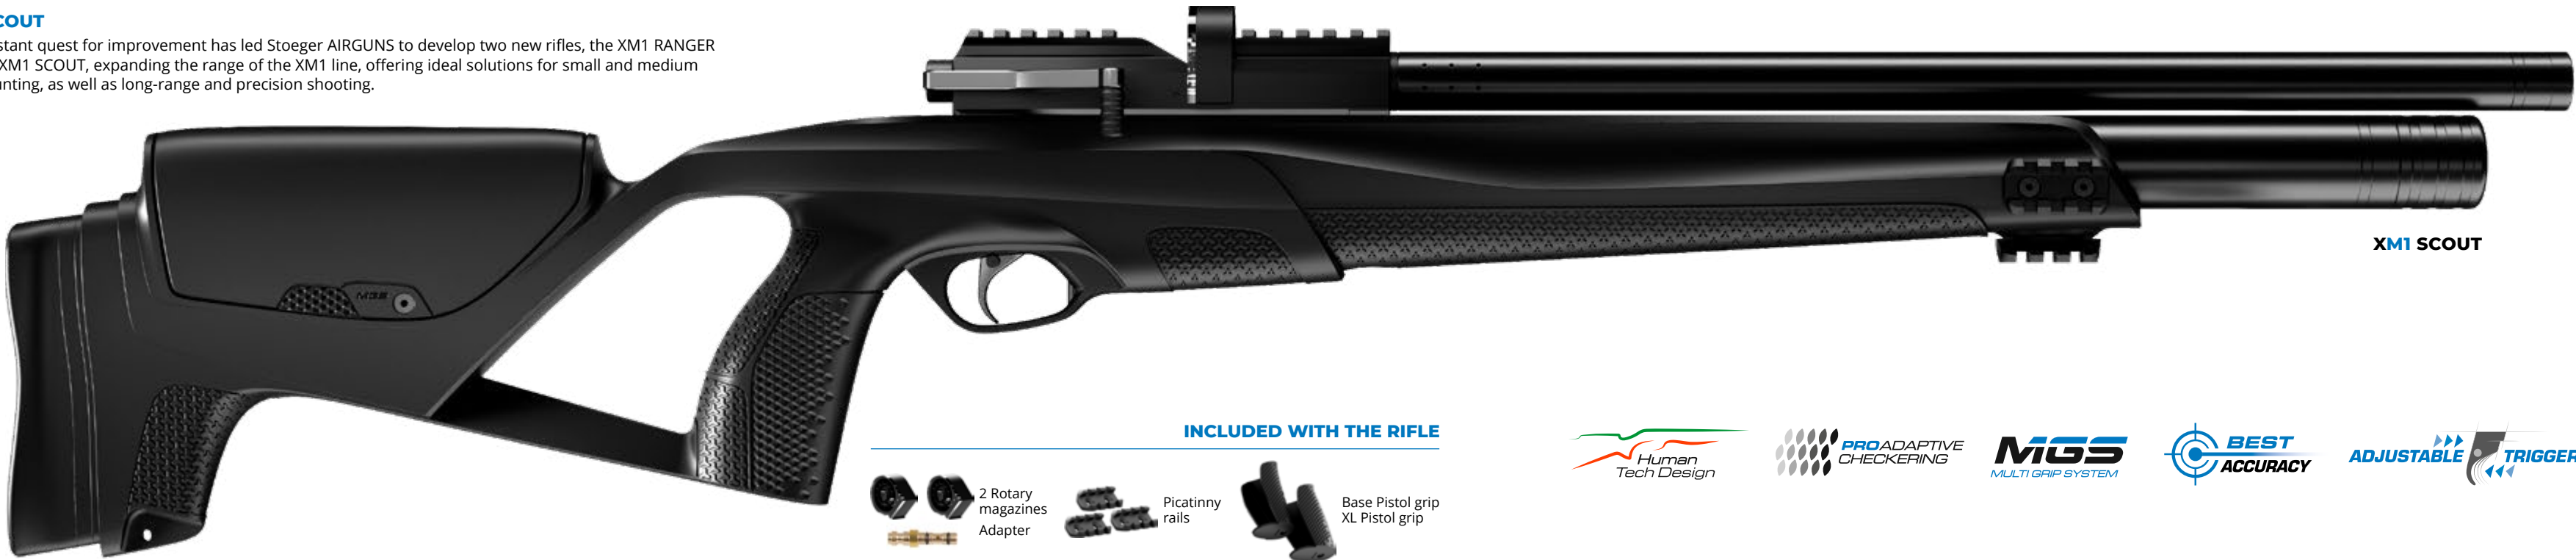

XM1 RANGER - TECHNICAL FEATURES

Caliber	4,5 mm /.177 - 5,5 mm /.22 - 6,35 mm /.25	Weight (+/- 0,1)	3,55 Kg

Barrel	460 mm - Free floating - Rifled, blued steel barrel with black anodized barrel cover and integrated air decompression chamber - Twist rate (mm) 1:480 - Muzzle thread 1/2" UNF	Suggested for	Medium game hunting / Small game hunting / Varmint control / Target shooting

- 01 Interchangeable cheekpiece**
Two comb size available to provide the best comfort to the shooter
- 02 Mag position**
- 03 Bullpup System**
- 04 Comfort rear pad**
To provide the best comfort and stability to the shooter
- 05 Two spacers to adapt the LOP**
To the shooter needs, LOP 355 mm max. (med.= 349 mm, min.= 343 mm)

- 06 Improved ergonomics**
The advanced stock design provide multiple grip and shooting position
- 07 Barrel**
490 mm barrel lenght
- 08 Picatinny rail**
Two later picatinny rails with mags rack
- 09 Straight-pull loading system**
To provide smooth and fast reload

- 10 Decompression chamber and holes**
To minimize the air turbulence at the muzzle
- 11 Trigger group**
Two stage trigger
- 12 Interchangeable pistol grip**
Two different size of pistol grip to provide the best comfort and ergonomics to the shooters
- 13 Integrated compensator**
To minimize the turbulance beayond the pellets and to be more accurate on target

- 14 Picatinny**
With mag rack
- 15 Air tank**
265 cc air volume tank
250 bar max pressure
- 16 Hi-Capacity Magazine**
11 rounds in 4,5 mm; 9 rounds in 5,5 mm; 8 rounds in 6,35 mm
- 17 Ergonomic front handle grip**
To be more comfortable during the shooting

4,5 mm/.177: 285 m/s - 935 fps 5,5 mm/.22: 240 m/s - 780 fps 6,35 mm/.25: 230 m/s - 755 fps

XM1 BULLPUP

The XM1 Bullpup is recognizable from its exclusive and innovative design developed in Italy from the very best expertise on the design. Inspired by the best in class automotive industries, the Stoeger AIRGUNS designers are constantly engaged on the development of new lines. The care on the details on design defines best in class ergonomics stock, offering better comfort and better accuracy. Ergonomic cocking lever position for a faster second target acquisition.

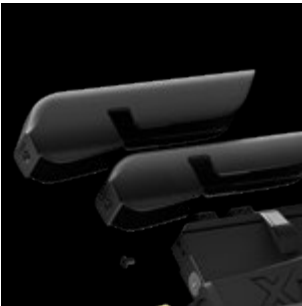

XM1 BULLPUP

INCLUDED WITH THE RIFLE

MULTI GRIP SYSTEM
Ergonomic Front Handle

CHEEKPIECE
Base - Raised

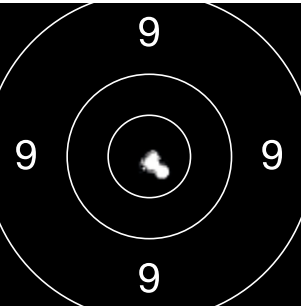

PRO ADAPTIVE LENGTH
Length of pull adjustable with color spacers for optimal comfort

ERGONOMIC BOLT LEVER
With exclusive THRIDION checkering for maximum grip

MULTI GRIP SYSTEM
Pistol grip: Base blue - XL black

HIGH PRECISION
XM1 Bullpup can perform the best accuracy in its category with a 5 shot group

XM1 BULLPUP - TECHNICAL FEATURES

Caliber	4,5 mm /.177 - 5,5 mm /.22 - 6,35 mm /.25	Weight (+/- 0,1)	2,8 Kg
Power source	Precharged pneumatic (PCP) with integrated regulator	Velocity cal. 4,5 mm (+/- 2%) 0,69 g pellet	Up to 285 m/s - 935 fps

Barrel	490 mm - Rifled, blued steel barrel with black anodized barrel cover and integrated air decompression chamber - Twist rate (mm) 1:480 - Muzzle thread 1/2" UNF	Suggested for	Medium game hunting / Small game hunting / Varmint control / Target shooting

- 01 Interchangeable cheekpiece**
Monte Carlo for scope
- 02 Interchangeable cheekpiece**
Base for open sight
- 03 Comfort rear pad**
To provide the best comfort and stability to the shooter
- 04 Two spacers to adapt the LOP**
To the shooter needs, LOP 355 mm max.
(med.= 349 mm, min.= 343 mm)

- 05 Improved ergonomics**
The advanced stock design provide multiple grip and shooting position
- 06 Hi-Capacity Magazine**
9 rounds in 4,5 mm ; 7 rounds in 5,5 mm
- 07 Interchangeable pistol grip**
Blue base
- 08 Interchangeable pistol grip**
Black XL

- 09 Pro Adaptive Trigger**
Most flexible trigger in its category, the first to offer the progressive regulation of the trigger length (-4 mm +8 mm) to provide smooth and fast reload
- 10 Thridion Pro Adaptive Checkering EBL system**
Ergonomic Bolt Lever is the first lever with exclusive Thridion checkering for maximum grip

- 11 Anti-reflection angle rear sight**
- 12 Air regulator integrated**
- 13 Left side picatinny rail**
With integrated rotary magazine rack and locking magnets.
The first revolutionary multi-use picatinny rail developed by the Italian Engineers integrating a rack for 3 spare magazines

red**dot** winner

**STOEGER AIRGUNS XM1
S4 SUPPRESSOR WON THE RED DOT AWARD
PRODUCT DESIGN**

The “Red Dot” is the award for high design quality.
The international jury only awards this sought-after seal
of quality to products that feature an outstanding design.

STATEMENT BY THE JURY

The highly dynamic and modern design of the XM1 S4
Suppressor air rifle presents a functionality that was composed
with ergonomic requirements in mind.

4,5 mm/.177: 280 m/s - 920 fps 5,5 mm/.22: 220 m/s - 720 fps

XM1

XM1 ensures the best performance in every shooting situation, thanks to the ergo/anatomical studies performed by Italian Engineers (Human Tech Design) and the best weight-stability ratio of the rifle.

INCLUDED WITH THE RIFLE

PRO ADAPTIVE LENGTH
Length of pull adjustable with color spacers for optimal comfort

XM1 SPORT

XM1 SPORT - SUPPRESSOR

INCLUDED WITH THE RIFLE

XM1 SPORT

The all-new XM1 SPORT rifles feature important technical solutions, technologies, and two improvements in order to meet the shooters who like to compete in amateur competitions and hit a new niche of market for the brand.

The Main features are the new Match Trigger that allows the end user to regulate the trigger, the new Muzzle Brake that allows the rifles to be more accurate reducing the turbulence on the pellets fired, the iconic XM1 Design, and the ergonomics of the rifles, the modularity thanks to the Stoeger AIRGUNS MGS Technology.

PRO ADAPTIVE LENGTH
Length of pull adjustable with color spacers for optimal comfort

ERGONOMIC BOLT LEVER
With exclusive THRIDION checkering for maximum grip

LEFT SIDE PICATINNY RAIL

RX20TAC
The RX20TAC is Stoeger AIRGUNS first Varmint rifle. It's carefully engineered for best shooting comfort and innovative style that allows exclusive fit and customization: T2 double stage trigger group; 3-9x40 AO scope and high power 2 ring mount; Picatinny side rails for bipod and accessories. Designed for dynamic shooters.

PRO ADAPTIVE LENGTH
Length of pull adjustable with color spacers for optimal comfort

SAFETY BUTTON
With Pro Adaptive Checkering

ADJUSTABLE TRIGGER
Adjustable T2 double stage trigger

MGS CHEEKPIECE
Adjustable cheekpiece in 3 steps, from 0 to 20mm

MULTI GRIP SYSTEM
Black Pro Adaptive Checkering
Blue embossed
Orange embossed

PISTOL GRIP/PADS
Included with the rifle

RX20TAC has identical external style to RX20TAC S2 SUPPRESSOR but without internal Suppressor technology. **RX20TAC longer barrel +95 mm extends to the muzzle.**

RX20TAC - TECHNICAL FEATURES

Caliber	4,5 mm /.177 - 5,5 mm /.22	Scope for combo	3-9x40AO scope with two rings
Power source	Spring or Gas Ram and Piston	Total length	44 in. / 1.122 mm
Cocking system	Break-action breech-loader with ergonomic cocking grip	Barrel length	Suppressor 13 in. / 332 mm; NO Suppressor 16.3 in. / 416 mm
Trigger	Stoeger AIRGUNS Adjustable trigger T2 - double stage	Weight	3 Kg without scope
Safety	Automatic, ambidextrous safety mounted on back of receiver	LOP	Max 370 mm - Medium 363 mm - Low 356 mm
Stock	Human Tech Design Stock with Pro Adaptive Checkering and Multi Grip System MGS	Velocity cal. 4,5 mm with alloy pellet	360 m/s - 1200 fps
Finish	Black Synthetic - Rifled, blued steel barrel	Velocity cal. 4,5 mm with lead pellet	305 m/s - 1000 fps

THE EVOLUTION OF SILENCE

PATENTED S3 SUPPRESSOR

Stoeger AIRGUNS **Patented* S3 Suppressor**: the ultimate innovation in the airguns industry. Completely developed from scratch, it is the first suppressor in the world to have an **interchangeable front sight** and an **air decompression chamber** that further enhances the performance of the new **air regulation baffles**, optimized to be more performing than the S2 version. The revolutionary design of the **S3 Suppressor** has made it possible to develop a **longer barrel (35 mm)**, hence with a greater precision of shooting.

Innovation, Technology and Style are the three principles behind our "Human Tech Design" philosophy. The Stoeger AIRGUNS RX20 S3 incorporates the very best in style and performance. The S3 Suppressor System combines the functions of an internal air regulation baffles and the new decompression chamber, that work in tandem to reduce noise better than any other airguns on the market.

4,5 mm/.177: 305 m/s - 1000 fps 5,5 mm/.22: 240 m/s - 800 fps

RX20 - PERFECT FEELING

Innovation, Technology and Style are the three principles behind a fully new concept. Stoeger AIRGUNS designer's challenge has been to develop and implement something special that could convey new emotions. The unique design and ergonomic shapes makes the air rifle fit perfectly to the shooter.

ACCURACY TO MEET EVERY REQUIREMENT FOR AIR RIFLES

Every shooter has specific requirements for his airgun when it comes to the ammunition. Our finely classified programme with a wide range of pellet shapes and weights will satisfy every need. Accuracy is a combination of several variables, the quality of the pellets is most important. Stoeger AIRGUNS pellets are Made in Germany with high tech technology.

PRACTICE TARGET

Lightweight accurate pellet for training and hobby shooting. Meets all underlying requirements. For universal use, at an extremely favourable price. Cal. 4,5mm /.177 and 5,5mm /.22

SUPER ACCURATE

Extremely accurate competition and training pellet for performance-oriented shooters. Tight shot groups, clean-cut bullet holes, excellent value for money. Cal. 4,5mm /.177 and 5,5mm /.22

GREAT PENETRATION

Medium-weight, very accurate pellet for hunting and precision shooting at medium ranges. Aerodynamic design for flat trajectories and perfect penetration. Cal. 4,5mm /.177 and 5,5mm /.22

MAX PENETRATION

Heavy, exceptionally accurate pellet for long ranges. No lead-fouling, improved drive in barrel, no contact with lead thanks to special copper coating (20% harder than comparable lead pellets). First-class aerodynamic design for high impact and penetration. Low deformation of pellet. Tight shot groups. Cal. 4,5mm /.177 and 5,5mm /.22

MAX SHOCK

Heavy, accurate hunting pellet for medium ranges. High impact and penetration with maximum shock effect, with blood grooves. Cal. 4,5mm /.177 and 5,5mm /.22

HIGH SHOCK, MAX IMPACT

Heavy, exceptionally accurate hunting pellet for long ranges. Advanced X-HOLLOW design with deep hollow point and best aerodynamic properties for maximum impact, high penetration and controlled deformation of pellet. Tight shot groups. Cal. 4,5mm /.177 and 5,5mm /.22

6-PACK 4.5MM /.177 DIFFERENT PELLETS

Test all our premium pellets in your airgun and choice the most appropriate for you:

- Velocity
- Shock effect
- Penetration

X-MATCH (40 Pellets) - X-POWER (35 Pellets)
X-MAGNUM (30 Pellets) - X-HOLLOW (30 Pellets)
X-HUNT (40 Pellets) - X-SPORT (40 Pellets)

Stoeger AIRGUNS reserves the right to make modifications to the products shown in this catalogue at any time without prior notice. The finishings shown in this catalogue are approximate, as a printed reproduction causes inevitable colour differences.
