		Cal. 5,5 mm with lead pellet		240 m/s

X20 - SYNTHETIC COMBO

X20 - WOOD COMBO

305 m/s

The ambidextrous automatic safety is conveniently located at the rear of the receiver where it can easily be engaged or disengaged while aiming. The receiver-mounted safety provides an extra level of safety over trigger-guard-mounted systems.

The precision, fiber-optic rear sight is fully adjustable for elevation and windage with click-numbered adjustment knobs. It features green fiber-optic sighting inserts for maximum visibility.

The protected front sight with a bright-red fiber-optic insert guarantees fast, accurate target acquisition. The ergonomically designed cocking grip allows for easy operation of the powerful, spring-piston action.

X20 models are available mounted in a Monte Carlo-style stock that makes target acquisition quick and easy. Stocks are available in hardwood or black synthetic.

A high-impact polymer trigger guard protects the two-stage trigger. The trigger assembly is factory set and can be screw-adjusted for second-stage length.
